LinguaSkin for Oracle

LinguaSkin
Enabling **Languages**

Your Software. Every Language. No Redevelopment.

LinguaSkin is the fastest, most cost-effective way to add and enhance multilingual capabilities for Oracle Fusion and Redwood applications.

It delivers a seamless, fully localised user interface without changes to the Oracle application - making it quicker to implement, easier to manage, and far more adaptable than traditional approaches.

Why LinguaSkin for Oracle?

- All languages, variants and dialects supported.
- Enhances existing language packs.
- Zero disruption – implement without modifying configuration or existing UX.
- Easily maintained – efficiently update translations any time.
- Flexibility - support dialects, terminology, tone and style.
- Complete coverage – customer-managed text covered, incl. Talent Acquisition.
- Rapid and Simple – remove language complexity while adding flexibility.
- Proven, Secure, Scalable.

LinguaSkin works as a secure HTTP proxy, inserting a language switcher and replacing interface text with pre-translated content. It is proven in enterprise deployments, scales from single apps to global rollouts, and reduces the cost and complexity of multilingual projects.

We are an Oracle Partner - ready to help you deliver multilingual Fusion solutions that win bids, satisfy customers, and open new markets.
